

NOTICE OF PUBLIC MEETING

A public meeting has been scheduled regarding the Traffic Impact Study and related issues concerning a proposed commercial development project along the west side of US 119 between Southridge Boulevard and Preferred Place in South Charleston, Kanawha County. This meeting is scheduled for Thursday June 1, 2017 from 5 to 7 PM at the Davis Creek Church of the Nazarene. This meeting will be a workshop format with informational exhibits available.

As proposed, the commercial project includes a roadway intersecting US 119 opposite Southridge Boulevard that will be controlled by the existing traffic signal. Left turns from this approach will be prohibited. An additional approach is proposed to intersect with the Ruthdale Road connector from Preferred Place Road. A new traffic signal is proposed at the intersection of US 119 with Preferred Place and the Ruthdale Road connector near Moses Factory Outlet. Modifications are also proposed for the existing park and ride facility near the project location.

Representatives of the developer and the consulting firm that prepared the Traffic Impact Study will be available to discuss the project and receive questions and comments.
